Hello 👋

I'm Leon from Cologne, Germany and have been working in software development since 2017. My expertise lies in implementing projects quickly and reliably using technologies such as React, Next.js and NestJS. Working closely with my clients, I provide customised solutions that are both functional and intuitive. My focus is on a clear and understandable approach that ensures applications remain straightforward, avoiding unnecessary complexity and offering real added value to users.

It is important to me to communicate with my clients on equal terms to understand their visions and goals. This open dialogue enables me to develop precise and efficient solutions. For every project, whether it's a small MVP or a more extensive venture, transparency, quality, and goal-oriented implementation are crucial to me.

I look forward to getting to know you and your project!

Tech Skills

TypeScript · React · Next.js · Svelte · TailwindCSS · Material UI · NestJS · Supabase · BullMQ · Node.js · Flutter · Firebase · PostgreSQL · WordPress · Gitlab CI/ CD · SonarCloud · DigitalOcean

Experience

Fullstack Developer/ Architect

🗄 Easy German Pension Refund 📍 Cologne/ Remote 📅 06/ 2023 - Present

- Conception and implementation of a React app (ViteJS) for customer data collection, including user management and internationalization
- Development of interfaces with TailwindCSS, integration of APIs using react-router
- Planning and provisioning of a Supabase instance as a backend for databases, S3 storage and TypeScript Edge Functions
- Configuration of CI/CD pipelines with GitHub Actions and Netlify

Fullstack Developer/ Architect

🗄 Interzero Product Cycle 📍 Berlin/ Remote 📅 01/ 2023 - Present

- Planning and agile implementation of several TypeScript React (Next.js) apps to support production processes using integrations with, among others, Google Vision, logistics provider, and MS Dynamics APIs
- Planning and development of a highly available NestJS Queue app for parsing XML data from a third-party system and connecting to MS Dynamics
- Design and development of interfaces using Balsamiq wireframing and TailwindCSS
- Setup of CI/ CD workflows with Gitlab Pipelines, SonarCloud and DigitalOcean

Instructor: CodeWeek

🏢 CSB System AG   📍 Geilen kirchen   🗓 10/ 2023 – 10/ 2023

- One-week coding course for students
- Introduction to web development with HTML, CSS, JS, and Svelte for ages 14-18
